Rabbit anti-Human CD63 mAb (CAP)

Catalog No.: RM17774

Basic Information

Catalog No.

RM17774

Catagory

Elisa Antibody Kit

Application

ELISA

Product Information

Ig Type

Rabbit IgG

Purification

Affinity purification

Endotoxin Level

Storage

Store at -20°C.

Avoid repeated freeze-thaw cycles.

Formulation

Supplied as a 0.2µm filtered solution in PBS with 0.05% Proclin300, PH 7.4.

Background

The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. The encoded protein is a cell surface glycoprotein that is known to complex with integrins. It may function as a blood platelet activation marker. Deficiency of this protein is associated with Hermansky-Pudlak syndrome. Also this gene has been associated with tumor progression. Alternative splicing results in multiple transcript variants encoding different protein isoforms.

Immunogen Information

Immunogen

Recombinant Human CD63 Protein

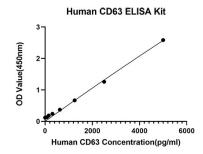

Cross-Reactivity

No significant cross-reactivity or interference between CD63 and analogues was observed.

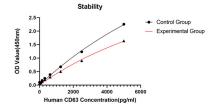

Assay Applications

Human CD63 Sandwich ELISA Immunoassay

	Recommended Concentration	Sample
ELISA Capture	1-4ug/mL	Rabbit anti-Human CD63(CAP)(Cat. No.RM17774)
ELISA Detection	0.075-0.3ug/mL	Rabbit anti-Human CD63(DET)(Cat. No.RM17775)
Standard	78-5000pg/mL	Recombinant Human CD63 Protein

This standard curve is only for demonstration purposes. A standard curve should be generated for eachassay.

Placed at 37° C for 3 days, the stability of the standard curve all conform to CV <10%.
