

Rabbit anti-Human NEFL mAb (CAP)

Catalog No.: RM17782

Basic Information

Catalog No.
RM17782

Catagory
Elisa Antibody Kit

Application
ELISA

Product Information

Ig Type
Rabbit IgG

Purification
Affinity purification

Endotoxin Level

Storage
Store at -20°C.
Avoid repeated freeze-thaw cycles.

Formulation
Supplied as a 0.2µm filtered solution in PBS with 0.05% Proclin300, PH 7.4.

Background

Neurofilaments are type IV intermediate filament heteropolymers composed of light, medium, and heavy chains. Neurofilaments comprise the axoskeleton and they functionally maintain the neuronal caliber. They may also play a role in intracellular transport to axons and dendrites. This gene encodes the light chain neurofilament protein. Mutations in this gene cause Charcot-Marie-Tooth disease types 1F (CMT1F) and 2E (CMT2E), disorders of the peripheral nervous system that are characterized by distinct neuropathies. A pseudogene has been identified on chromosome Y.

Immunogen Information

Immunogen
Recombinant Human NEFL Protein

Cross-Reactivity

No cross-reactivity in ELISA with recombinant NEL

Assay Applications

Human NEFL Sandwich Immunoassay

		Recommended Concentration	Sample
ELISA	Capture	0.5-2ug/mL	Rabbit anti-Human NEFL mAb(Cat. No.RM17782)
	Detection	0.02-0.083ug/mL	Rabbit anti-Human NEFL mAb(Cat. No.RM17783)
	Standard	31.25-2000pg/mL	Recombinant Human NEFL Protein

Validation Data

This standard curve is only for demonstration purposes. A standard curve should be generated for each assay.

From the comparison of the standard curve, it is found that ABclonal has high sensitivity.

No significant cross-reactivity or interference was observed.

Placed at 37°C for 3 days, the stability of the standard curve all conform to CV <10%.
