

Catalog No.: RP02813 **Recombinant**

Species	Gene ID	Swiss Prot
Human	7428	P40337

N-His-C-Avi

RCA1; VHL1; pVHL; HRCA1

Source	Purification
<i>E. coli</i>	≥ 75 % as determined by SDS-PAGE.

Calculated MW	Observed MW
27.5 kDa	25-30 kDa

Please contact us for more information.

Lyophilized from a 0.22 μm filtered solution of 50 mM Tris, pH 7.5.

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Recombinant Human VHL Protein is produced by *E. coli* expression system. The target protein is expressed with sequence (Met1-Asp213) of human VHL (Accession #NP_000542.1) fused with a 6×His tag at the N-terminus and an AVI tag at the C-terminus.

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.
After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human VHL Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
